

Fill out this form completely. MRI uses a very strong magnet. Metal objects in your body may be hazardous. Metal objects on your body or clothing may be hazardous to you and others in the MRI scan room. You must remove all loose or removable objects containing metal before entering the MRI scan room.

Patient Name: _____ Patient DOB: _____

What problem or symptoms is this test evaluating: _____

Please indicate if you have any of the following:

Yes No

- Cardiac pacemaker or defibrillator
- Internal or external electrodes or wires
- Brain aneurysm clip(s) or coils
- Currently wearing a Neulasta® Device?
- Heart valve prosthesis
- Wires from a pacemaker or defibrillator
- Implantable loop recorder/insertable cardiac monitor
- Metallic stent, filter, coil, etc.
- Neurostimulator, TENS unit, or spinal stimulator
- Electrical Bone Growth Stimulator for spinal fusion
- Pump for Insulin or other medication (Minimed, Mini Link)
- Continuous glucose monitor (e.g. Freestyle Libre, Dexcom)
- Medication patch (fentanyl, nicotine, nitroglycerine, etc.)
- Cochlear implant or other ear implant
- Hearing aid (remove before entering MRI room)
- Shunt (spinal or intraventricular)
- Post-surgical epidural catheter for pain control
- Vascular access port or catheter
- Temperature Sensing Foley Catheter
- Swan-Ganz or thermodilution catheter
- Artificial or prosthetic limb
- Joint replacement (hip, knee, etc.)
- Orthopedic brace, splint or device
- Bone pin, screw, nail, wire, plate, etc.
- Any type of prosthesis (eye, penile, etc.)
- Surgical staples, clips or metal sutures
- Radiation seeds or implants
- Wire mesh implant
- Tissue expander
- IUD, diaphragm or pessary
- Dentures or partial plates
- Tattoo or permanent makeup
- Body piercing
- Magnetic eyelashes
- Wound dressing containing silver
- Have you had a capsule (pill) endoscopy study in the last 30 days?
- Have you had clips placed during an endoscopy procedure?
- Have you ever been injured by a metallic object (bullet, BB, shrapnel, buckshot, etc.)?
- Magnetically-activated implant or device
- Eye injury involving a metallic object **FOR WHICH YOU SOUGHT MEDICAL TREATMENT?**
- Eye or eyelid implant or metal or cosmetic contact lenses
- Cataract surgery prior to 1995
- Any other metal or surgical implant, list: _____

If you have a medical card with surgical implant name/model, please show this to the MRI technologist

I have been instructed to remove all metal that I may have on my body, clothing and pockets before entering the scanning room.

Initialed by Patient

Thermal burns are a risk during MRI scanning. Radiology takes precautions to decrease the risk of burns. Patients with cognitive or verbal impairment, including those under anesthesia, are at an increased risk due to the inability to inform the technologist of pain.

- Yes No
- Are you claustrophobic?
- Have had any problem related to a previous MRI procedure? _____
- Have you taken any sedation medication for this exam? _____
- Do you have a history of asthma or respiratory disease?
- Have you ever had a reaction to contrast (dye) used for an MRI, CT, cath procedure or X-ray exam?
If yes, explain: _____

Your current weight: _____ height: _____

Female patients:

- | Yes | No | Yes | No |

| <input type="checkbox"/> | <input type="checkbox"/> | | |
- Are you receiving fertility medication or treatment? Are you pregnant?
- On oral contraceptives or hormonal treatment? Are you breastfeeding?
- Experiencing a late period?
- Are you postmenopausal (last period more than 12 months ago)?

Date of last menstrual period: _____

****DO NOT ENTER MRI SCAN ROOM IF YOU HAVE ANY UNANSWERED QUESTIONS OR CONCERNS****

I attest that the above information is correct to the best of my knowledge. I have read and understand the entire contents of this form, have had an opportunity to ask questions about the information on this form and the MRI procedure I am about to undergo, and have had all of my questions answered.

Patient Signature (or responsible guardian): _____ Date: _____

Form completed by: Patient Other: _____
Print name (and title or relationship to patient)

Form Reviewed by Technologist: _____

Contrast patients only:

I have read and understand the information provided to me about MRI contrast agents. All of my questions have been answered and I agree to have this study performed with the injection of the MRI contrast as ordered by my provider.

Patient Signature (or responsible guardian): _____

**MEDICATION
GUIDE
DOTAREM® (doh TAH rem)
(gadoterate meglumine)**

What is DOTAREM?

- DOTAREM is a prescription medicine called a gadolinium-based contrast agent (GBCA). DOTAREM, like other GBCAs, is injected into your vein and used with a magnetic resonance imaging (MRI) scanner.
- An MRI exam with a GBCA, including DOTAREM, helps your doctor to see problems better than an MRI exam without a GBCA.
- Your doctor has reviewed your medical records and has determined that you would benefit from using a GBCA with your MRI exam.

What is the most important information I should know about DOTAREM?

- DOTAREM contains a metal called gadolinium. Small amounts of gadolinium can stay in your body including the brain, bones, skin and other parts of your body for a long time (several months to years).
- It is not known how gadolinium may affect you, but so far, studies have not found harmful effects in patients with normal kidneys.
- Rarely patients have reported pains, tiredness, and skin, muscle or bone ailments for a long time, but these symptoms have not been directly linked to gadolinium.
- There are different GBCAs that can be used for your MRI exam. The amount of gadolinium that stays in the body is different for different gadolinium medicines. Gadolinium stays in the body more after Omniscan or Optimark than after Eovist, Magnevist or MultiHance. Gadolinium stays in the body the least after Dotarem, Gadavist or ProHance.
- People who get many doses of gadolinium medicines, women who are pregnant and young children may be at increased risk from gadolinium staying in the body.
- Some people with kidney problems who get gadolinium medicines can develop a condition with severe thickening of the skin, muscles and other organs in the body (nephrogenic systemic fibrosis). Your healthcare provider should screen you to see how well your kidneys are working before you receive DOTAREM.

Do not receive DOTAREM if you have had a severe allergic reaction to DOTAREM.

Before receiving DOTAREM, tell your healthcare provider about all your medical conditions, including if you:

- have had any MRI procedures in the past where you received a GBCA. Your healthcare provider may ask you for more information including the dates of these MRI procedures.
- are pregnant or plan to become pregnant. It is not known if DOTAREM can harm your unborn baby. Talk to your healthcare provider about the possible risks to an unborn baby if a GBCA such as DOTAREM is received during pregnancy.
- have kidney problems, diabetes, or high blood pressure.
- have had an allergic reaction to dyes (contrast agents) including GBCAs.

What are possible side effects of DOTAREM?

- See “What is the most important information I should know about DOTAREM?”
- **Allergic reactions. DOTAREM can cause allergic reactions that can sometimes be serious. Your healthcare provider will monitor you closely for symptoms of an allergic reaction.**

The most common side effects of DOTAREM include: nausea, headache, pain, or cold feeling at the injection site, and rash.

These are not all the possible side effects of DOTAREM.

Call your doctor for medical advice about side effects. You may report side effects to FDA at 1-800-FDA-1088.

General information about the safe and effective uses of DOTAREM.

Medicines are sometimes prescribed for purposes other than those listed in a Medication Guide. You can ask your healthcare provider for information about DOTAREM that is written for health professionals.

What are the ingredients in DOTAREM? Active

ingredient: gadoterate meglumine Inactive

ingredients: DOTA, water for injection

Manufactured by: Catalent (pre-filled syringes) and Recipharm (vials) for Guerbet

For more information, go to www.guerbet.com or call 1-877-729-6679.

This Medication Guide has been approved by the U.S. Food and Drug Administration.
