

SAFETY SCREENING FORM FOR MAGNETIC RESONANCE (MR) PROCEDURES

Name _____ Weight _____ Date _____

WARNING: Certain implants, devices, or objects may be hazardous to you and/or may interfere with the MR procedure. Please read the following carefully and answer each line to the best of your ability. If you have questions about this form, please consult your MRI technologist BEFORE entering the MRI environment. ALL patients are required to remove jewelry and other personal items and wear hospital-provided clothing for this procedure. ALL patients are required to wear hearing protection during the procedure.

Please answer yes or no for each item

- | | |
|--|---|
| <input type="checkbox"/> Yes <input type="checkbox"/> No Cardiac pacemaker, implanted cardiac defibrillator, or internal pacing wires. | <input type="checkbox"/> Yes <input type="checkbox"/> No Stents, intravascular stents, filters, or coils (vascular clips, colls, or filters)
If yes where located? _____ |
| <input type="checkbox"/> Yes <input type="checkbox"/> No Aneurysm or Aortic clips/aneurysm repair | <input type="checkbox"/> Yes <input type="checkbox"/> No Sleep apnea implanted device |
| <input type="checkbox"/> Yes <input type="checkbox"/> No Electronic stimulator (Neuro/Spinal cord stimulator, DBS, bladder stimulator, or bone stimulator) | <input type="checkbox"/> Yes <input type="checkbox"/> No Vascular access port and/or catheters (e.g., post-surgical epidural catheter, temperature sensing foley catheter) |
| <input type="checkbox"/> Yes <input type="checkbox"/> No Implantable loop recorder/insertable cardiac monitor | <input type="checkbox"/> Yes <input type="checkbox"/> No Surgical or biopsy staples, clips, wires, or surgical mesh |
| <input type="checkbox"/> Yes <input type="checkbox"/> No Insulin or Infusion pump | <input type="checkbox"/> Yes <input type="checkbox"/> No Pessary or bladder ring |
| <input type="checkbox"/> Yes <input type="checkbox"/> No Continuous glucose monitor (e.g., Freestyle Libre, Dexcom) | <input type="checkbox"/> Yes <input type="checkbox"/> No Body piercings |
| <input type="checkbox"/> Yes <input type="checkbox"/> No Implanted insulin or drug Infusion device (e.g. Neulasta, Baclofen pump) | <input type="checkbox"/> Yes <input type="checkbox"/> No Tattoo or permanent make up |
| <input type="checkbox"/> Yes <input type="checkbox"/> No Medication patch (nicotine, nitroglycerine, etc.) | <input type="checkbox"/> Yes <input type="checkbox"/> No Metallic/magnetic make up, eyelashes or hair products |
| <input type="checkbox"/> Yes <input type="checkbox"/> No Shunt (spinal or intraventricular) | <input type="checkbox"/> Yes <input type="checkbox"/> No Claustrophobic |
| <input type="checkbox"/> Yes <input type="checkbox"/> No Tissue expander | <input type="checkbox"/> Yes <input type="checkbox"/> No Dental braces/ palate expander or magnetic dental implant, or partials or dentures |
| <input type="checkbox"/> Yes <input type="checkbox"/> No Hearing aids or cochlear, otologic, or other ear Implant | <input type="checkbox"/> Yes <input type="checkbox"/> No Wound dressing containing silver |
| <input type="checkbox"/> Yes <input type="checkbox"/> No Prosthesis (eye/orbital, penile, artificial limb, bone/joint pin, implant held in place by magnet etc.) | <input type="checkbox"/> Yes <input type="checkbox"/> No Breathing problems, sleep apnea, tremors, or involuntary motion disorders |
| <input type="checkbox"/> Yes <input type="checkbox"/> No Joint replacement | <input type="checkbox"/> Yes <input type="checkbox"/> No Eye/eyelid implant or metal, cosmetic contact lens, or scleral buckle |
| <input type="checkbox"/> Yes <input type="checkbox"/> No Heart valve replacement/repair | <input type="checkbox"/> Yes <input type="checkbox"/> No Currently pregnant |
| <input type="checkbox"/> Yes <input type="checkbox"/> No Vascular grafts | |

Have you ever

- ☐ Yes ☐ No had a previous MRI
- ☐ Yes ☐ No had a reaction to contrast (dye) used for a MRI, CT, cath procedure or x-ray exam?
- ☐ Yes ☐ No had an eye injury from a metallic object (e.g., metallic slivers, shavings or foreign body or any profession or hobby grinding metals)?
- ☐ Yes ☐ No been injured by a metallic foreign body (e.g., bullet, BB, buckshot, or shrapnel)?

History of ☐ liver or kidney disease ☐ organ transplant ☐ dialysis

Have you ever been diagnosed with cancer? ☐ Yes ☐ No If yes, please tell us your primary: _____

In the last 60 days, have you had a ☐ colonoscopy ☐ endoscopy ☐ pill endoscopy? With or without clips? _____

Please list all surgeries: _____

Completed & Signed by: ☐ Patient ☐ Patient Representative ☐ Parent/Guardian ☐ Nurse _____ Date _____

APPROVED FOR MRI: ☐ Yes ☐ No

SCAN MODE: FIRST LEVEL NORMAL LOWSAR B1+RMS

MEDICATION GUIDE
CLARISCAN™ (kla-ri'-skan)
(gadoterate meglumine)
injection for intravenous use

What is Clariscan?

- Clariscan is a prescription medicine called a gadolinium-based contrast agent (GBCA). Clariscan, like other GBCAs, is injected into your vein and used with a magnetic resonance imaging (MRI) scanner.
- An MRI exam with a GBCA, including Clariscan, helps your doctor to see problems better than an MRI exam without a GBCA.
- Your doctor has reviewed your medical records and has determined that you would benefit from using a GBCA with your MRI exam.

What is the most important information I should know about Clariscan?

- Clariscan contains a metal called gadolinium. Small amounts of gadolinium can stay in your body including the brain, bones, skin and other parts of your body for a long time (several months to years).
- It is not known how gadolinium may affect you, but so far, studies have not found harmful effects in patients with normal kidneys.
- Rarely patients have reported pains, tiredness, and skin, muscle or bone ailments for a long time, but these symptoms have not been directly linked to gadolinium.
- There are different GBCAs that can be used for your MRI exam. The amount of gadolinium that stays in the body is different for different gadolinium medicines. Gadolinium stays in the body more after Omniscan or Optimark than after Eovist, Magnevist or MultiHance. Gadolinium stays in the body the least after Clariscan, Dotarem, Gadavist or ProHance.
- People who get many doses of gadolinium medicines, women who are pregnant and young children may be at increased risk from gadolinium staying in the body.
- Some people with kidney problems who get gadolinium medicines can develop a condition with severe thickening of the skin, muscles and other organs in the body (nephrogenic systemic fibrosis). Your healthcare provider should screen you to see how well your kidneys are working before you receive Clariscan.

Do not receive Clariscan if you have had a severe allergic reaction to Clariscan.

Before receiving Clariscan, tell your healthcare provider about all your medical conditions, including if you:

- have had any MRI procedures in the past where you received a GBCA. Your healthcare provider may ask you for more information including the dates of these MRI procedures.
- are pregnant or plan to become pregnant. It is not known if Clariscan can harm your unborn baby. Talk to your healthcare provider about the possible risks to an unborn baby if a GBCA such as Clariscan is received during pregnancy.
- have kidney problems, diabetes, or high blood pressure.
- have had an allergic reaction to dyes (contrast agents) including GBCA.

What are possible side effects of Clariscan?

- See “What is the most important information I should know about Clariscan?”
- **Allergic reactions. Clariscan can cause allergic reactions that can sometimes be serious. Your healthcare provider will monitor you closely for symptoms of an allergic reaction.**

The most common side effects of Clariscan include: nausea, headache, pain, or cold feeling at the injection site, and rash.

These are not all the possible side effects of Clariscan.

Call your doctor for medical advice about side effects. You may report side effects to FDA at 1-800-FDA-1088.

General information about the safe and effective uses of Clariscan.

Medicines are sometimes prescribed for purposes other than those listed in a Medication Guide. You can ask your healthcare provider for information about Clariscan that is written for health professionals.

What are the ingredients in Clariscan?

Active ingredient: gadoterate meglumine

Inactive ingredients: DOTA, water for injection

Manufactured by: GE Healthcare AS Oslo, Norway
